AN IMMERSIVE AUDIO PROPOSAL

What if your audiobook knew you'd walked into a floating nightclub?

The Secrets of Silver Clouds

A complete narrated scene already brings the Sanctuary to life.
The next ambition is a story-aware journey through the wider world.

NARRATION AT THE HEART. A WORLD AROUND IT.

British urban fantasy. Anime energy. Created by Silent Silver.

THE ORIGINAL WORLD

A hidden London.
An impossible family.

Adult Animantasy: British urban fantasy shaped by anime energy, explosive action, found family and irreverent British humour.

A family mystery draws Ashai into a London of celestial powers, supernatural music battles and dangerous new allies. The published novel supplies the story; its world offers places listeners can return to.

Goaden and Ashai, with Greah and Kai, above London.

TWO DISTINCTIVE AUDIO PILLARS

Sanctuary: music, emotion and nightlife.

Duskkin: mythical hunts and changing armour.

GUARDIANS ABOVE LONDON

At the bar, you can order a feeling.

A complete narrated scene plays inside the Sanctuary in the Sky, a supernatural nightclub floating above London.

LISTEN Narration, music and atmosphere carry the scene.

LOOK Artwork follows the recording: the dance floor at 1:30, the Silver Wing at 2:45.

EXPLORE Mix emotional Soul Sips or reveal nearby thoughts with Mind Melters. Interaction is optional.

Enter the Sanctuary

Existing narrated scene + optional interactions

The world keeps its own rhythm.

WORLDSTREAM

Worldstream already simulates activity between visits and offers a reading-based 'While you were away' recap. Its proposed audio role is to give listeners small moments of character life between main plot beats.

Explore Worldstream

THE STREAMLINER

A narrated maintenance-carriage scene with moving scenery, magical phasing and an optional Road Sprite repair experience.

Step aboard the Streamliner

These experiences work separately today. Connecting them to a shared audiobook journey is the proposed next step.

Let the story set the scene.

A shared playback timeline could connect the recording to its surroundings, then make room for optional character moments between major plot beats.

01 **Follow the narration**
Use audio position to identify the current scene and its cues.

02 **Bring the surroundings alive**
Cue artwork, music, ambience or optional widgets at story-defined moments.

03 **Spend time with the characters**
Offer short, optional scenes during downtime without advancing or changing the main plot.

04 **Return with context**
Connect audio progress to a spoiler-aware return recap and resume the listener's place in the main story.

POSSIBLE DOWNTIME

Goaden and Ashai could meet Road Sprites, encounter Nimbus the cloud rat, or visit the magical tattoo shop.

Illustrative possibilities, not events claimed to have happened. Optional scenes would respect established canon and leave the main story unchanged.

The original story remains complete in audio alone.

Help shape the next audio release.

Seeking audio production, publishing, distribution and development conversations around a professionally produced Silver Clouds pilot.

01

Scope the pilot

Choose a self-contained scene, intended audience, listening format and a realistic route to release.

02

Agree the production

Define the team, casting, sound, interactive cues, rights, budget, schedule and delivery milestones.

03

Learn from listeners

Agree measures for listening completion, repeat visits, usability and interest in further releases.
